

Objectives

At the completion of this conference, the successful learner will know and understand:

- HF management from prevention to palliation and the opportunities and challenges the HF patient in Cardiac Rehab may face;
- The 2018 Gold Standards for COPD, diagnosis and treatment;
- The major valve disorders affecting adults;
- The prevalence, pathophysiology, clinical implication/presentation, treatment options (current/traditional, transcatheter, and future/research) of each valve disorder;
- The current recommendations and best practice in Cardiac and Pulmonary Rehab including 2018 changes in outcomes, documentation and certification requirements;
- Exercise progression and problem oriented exercise management for the Cardiopulmonary Disease patient;
- Guidelines for exercise testing and assessment of cardiopulmonary patients.;
- The 5 metabolic phenotypes in pulmonary disease.
- What tools are needed for nutrition assessment, indications for intervention, and location of resources for further information;
- How to describe common impediments upon healthy eating behavior, food patterns, and behavioral recommendations for improvement;
- The distinct classifications of pulmonary hypertension (PH), risk factors and current treatment options.

Continuing Education Credits

10 CEU's from AACVPR & AARC will be awarded at the completion of the conference. The planning committee members reported no relevant financial relationships to disclose.
